Notes to Editors

Europa Oil & Gas (Holdings) plc has a diversified portfolio of multi-stage hydrocarbon assets which includes production, development and exploration interests, in countries that are politically stable, have transparent licensing processes, and offer attractive terms. Production for the year ending 31 July 2022 was 245 bopd. In April 2022, Europa farmed into P.2358, Block 13/23c ("Serenity") in the Outer Moray Firth area of the North Sea. The licence contains the 2019 Serenity oil discovery, in which Europa now has a 25% interest. The Company holds one exploration licence offshore Ireland, which has the potential to host gross mean un-risked prospective resources of 1.5 trillion cubic feet ("tcf") gas. Inishkea is a near field gas prospect in the Slyne Basin which the Company classifies as lower risk

due to its close proximity to the producing Corrib gas field and associated gas processing infrastructure.
